Sales Scripts & Talk Tracks

What to say, when to say it

The Revenue Equation

Revenue = Traffic × Conversion × Average Order Value × Frequency

Most businesses optimize only one variable. Winners optimize all four.

VARIABLE	LEVER	EXAMPLE IMPROVEMENT
Traffic	More qualified visitors	SEO, ads, partnerships
Conversion	More visitors become customers	Better copy, UX, offers
AOV	Each customer spends more	Upsells, bundles, premium options
Frequency	Customers buy more often	Email, loyalty, subscriptions

Your Ideal Customer Profile (ICP)

Don't market to everyone. Define your perfect customer:

Checklist

The Customer Journey Map

```
AWARENESS → CONSIDERATION → DECISION → RETENTION → ADVOCACY
    |             |              |           |           |
    ↓             ↓              ↓           ↓           ↓
 Blog posts    Case studies   Free trial   Onboarding  Referral
 Social media  Comparisons    Demo call    Support     program
 PR/Media      Reviews        Proposal     Training    Reviews

Platform Selection Guide

PLATFORM	BEST FOR	CONTENT TYPE	POSTING FREQUENCY
LinkedIn	B2B, professional services	Thought leadership, long-form	3-5x/week
Twitter/X	Tech, media, real-time	News, opinions, threads	1-5x/day
Instagram	Visual products, lifestyle	Photos, Reels, Stories	1x/day + Stories
Facebook	Local, community, older demo	Mixed, Groups	1-2x/day
TikTok	Gen Z, viral potential	Short video	1-3x/day

Recommendation: Master ONE platform before expanding.

The Content Mix (80/20 Rule)

80% Value Content:

The Complete Playbook

Putting it all together

The Discovery Call Framework

Opening (2-3 minutes)

```
Thanks for taking the time today, [Name].

Before we dive in, I'd like to understand your situation
better so I can be most helpful. Is it okay if I ask a
few questions first, and then we can discuss if and how
we might be able to help?

[Confirm agenda and time available]
```

Discovery Questions (10-15 minutes)

```
1. Tell me about your current situation with [problem area].

2. What prompted you to look for a solution now?

3. What have you tried so far? What worked/didn't work?

4. If you solved this problem, what would that mean for
   your [business/team/customers]?

5. What would happen if nothing changed in the next 6-12 months?

6. Who else is involved in making this decision?

7. What's your timeline for implementing a solution?

8. Do you have budget allocated for this?
```

Present Solution (5-10 minutes)

```
Based on what you've shared, here's how we might be able to help...

[Connect each feature to a pain point they mentioned]

"You mentioned [problem]. Our [feature] specifically
addresses that by [benefit]."
```

Trial Close

```
Based on what we've discussed, does this seem like it
could solve your [problem]?

What questions do you have?

What would need to be true for you to move forward?
```

Common Objections & Responses

"It's too expensive"

```
I understand budget is a consideration. Help me understand—
too expensive compared to what?

[If compared to competitor]: What differences do you see
that might justify the price difference?

[If just expensive in general]: Let's look at the ROI.
You mentioned [problem] costs you [X]. Our solution would
pay for itself in [timeframe].
```

"I need to think about it"

```
Of course—this is an important decision.

To help you think it through, what specific aspects are
you weighing?

What information would help you make this decision?

If we could address [concern], would you be ready to move forward?
```

"We're already using [competitor]"

```
Great—how's that working for you?

[If working well]: What made you take this call today?

[If challenges]: What would need to be different for you
to consider making a change?
```

"I need to talk to my [boss/partner/team]"

```
That makes sense. What do you think their main concerns
or questions will be?

Would it help if I put together a summary document you
could share with them?

Can we schedule a follow-up call that includes them?
```

"We don't have time right now"

```
I hear you—everyone's busy.

Quick question: is this a priority that keeps getting
pushed, or is there a specific thing that needs to happen
first?

What would need to change for this to become a priority?
```
